Document Ref:	ZAY-MFG-BOM-2026-V5	**Classification:**	Proprietary Commercial Formulation
Regulatory Track:	AYUSH Schedule T (GMP) / FSSAI 2022	**Batch Production:**	Commercial Pilot & Scale-Up Ready
Clinical Author:	Dr. Irfan Ashraf / Clinical Knowledge Desk	**Effective Date:**	September 2026 | Version 5.0 Enterprise
Testing Authority:	HPLC Active Marker Assays (USP/UPI)	**Pharmacopoeia:**	Unani Pharmacopoeia of India (UPI Vol 1-6)

1. EXECUTIVE SUMMARY & MANUFACTURING DIRECTIVE

This master engineering document provides the exact pharmaceutical Bill of Materials (BOM), HPLC phytochemical standardizations, organ-axis classifications, and Schedule E(1) detoxification (Mudabbar) protocols for commercial batch production within the ZAYVORA Health OS manufacturing continuum. All formulations are verified against the Unani Pharmacopoeia of India (UPI), Ayurvedic Pharmacopoeia of India (API), and AYUSH GMP norms.

Key Manufacturing Directives:

1. **Standardization Thresholds: All botanical extracts must meet HPLC assayed active marker concentrations (e.g., Withanolides 5%,** Gymnemic acids 25%, AKBA 30%, Reserpine 1.0%). Crude unstandardized powders are rejected at QA quarantine.
2. **Schedule E(1) Gates: Ingredients such as Kuchla (Strychnos nux-vomica) and Suranjan (Colchicum autumnale) require authenticated** SOP Mudabbar certificates prior to release from Raw Material Stores.
3. **Kushta / Calcined Mineral Processing: Products containing Kushta (Tin calx, Egg Shell calx, Coral calx) are manufactured in dedicated** micro-pulverization clean rooms under AYUSH Proprietary licensing.
